

**NEW**

**RAINWATER  
COLLECTOR  
D 160**

# RAINWATER COLLECTOR D 160

New model large-capacity, plastic roof collector. Produced in two varieties – the first is all plastic and the second is a combination of plastic with a cast-iron upper surface. The structure of the roof collector is reinforced with ribbing, which ensures greater strength and stability of the product in the ground. Also included is a dry, anti-odour flap to prevent backup odours from the sewer pipe. The new hinged-lid system is simpler, in order to give easy access to the removable filter basket, preventing dirt from spreading. Triple protective partition against seepage, dirt collection basket in plastic or stainless steel – made to order.

- ✓ UV stabilized
- ✓ Load capacity K3 (300 kg)
- ✓ Anti-odour trap with flap
- ✓ In black colour with bottom outlet D 160
- ✓ Basket for collecting dirt in plastic or to order in stainless steel
- ✓ Ribbed reinforcement
- ✓ New lid opening system
- ✓ Triple barrier protection against leakage
- ✓ Low construction height
- ✓ The use of the KGUG L / PVC.DN 150 coupling is no longer necessary
- ✓ With the possibility of reducing the upper inlet by spacers rings D 110 or D 125
- ✓ The plastic version contains an eccentric ring lid for the outlet, which is intended for cutting diameters 110, 120, 140, 160 mm
